

BEA Srl from experience and conviction of its management firmly believes in the usefulness of international certification schemes as a means and method to improve its performance and thus make itself more competitive in the global market.

For these reasons after more than 3 decades since the achievement of ISO 9001 certification and a decade since the achievement of PED, BEA Srl has decided to expand its certification portfolio as listed below:

- UNI EN ISO 9001:2015
- 2014/68/EU PED Directive
- API Q1 9th Edition - June 2013
- API 20E
- API 20F

BEA trains and updates all levels of the company in order to create a culture that embraces the values of these certifications and can thus permeate the company, its products and services.

The Quality policy contains the underlying principles by which the company is inspired and consequently takes the lead in setting Bea's objectives for the maintenance and continuous development of the integrated management system ISO 9001-API Q1, API 20E and API 20F

BEA considers it of primary importance to ensure business continuity to carry out a careful risk analysis annually that can prevent or in the event mitigate the occurrence of unforeseen events that would affect the achievement of the objectives the company has set for itself.

The objectives that BEA considers imperative to pursue are.

- Attention to the market in which it operates and competes (oil & gas)
- Quick and effective response to customer requests
- Constant research of new technologies for production
- Control of every possible detail of its production chain
- Continuous training of staff knowledge and skills
- An extremely well-stocked warehouse to give immediate response to market needs.

BEA Srl is a protagonist of the present with its technology, commercial strength and strategic presence.

A world leader in the production of tie rods for the energy sector and international markets.

The policy inspired by the objectives stated above leads to:

- Commitment to compliance with mandatory legislation and other requirements
- Commitment to continuous improvement
- Commitment to customer satisfaction
- Commitment to providing products that are the result of the best available technologies
- Commitment to the search for new markets and development opportunities

These commitments made by the company are among the elements that enable management to evaluate the choice of improvement objectives.

The Policy is known, shared and disseminated internally and with anyone who requests it externally: whether they are customers, suppliers, institutions or associations.

The adequacy of the contents of this document is re-evaluated every 12 months at most during management review before periodic maintenance of certification.
